We are Strive AV

Hello and welcome! At Strive AV, we're passionate about technology and work with the leading industry brands to deliver the very best solutions for our customers.

In our 23 / 24 technology product guide, created in partnership with our key brand suppliers, we are excited to share the latest and greatest technologies making an impact in the corporate and education sectors.

Every product in this guide has been handpicked by Strive AV, based on its performance, quality, and user-friendly operation, to provide you with the audio-visual solutions required to build a robust future.

For more information on any of the products featured, please don't hesitate to get in touch.

Toni Chalk Managing Director

SUPERIOR SERVICES

Strive AV works hard, striving to be the best by going above and beyond expectations to provide professional and helpful services to our clients.

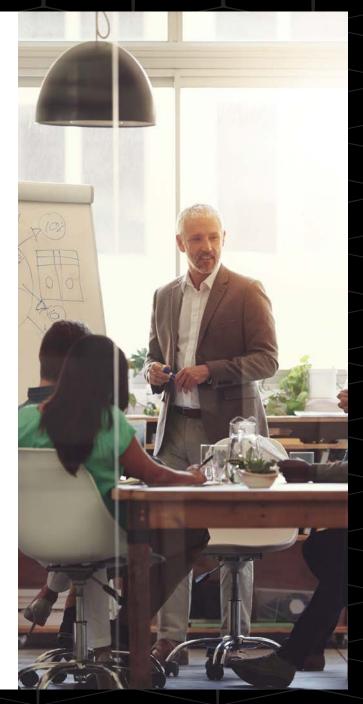

Our Maintenance Contracts offer peace of mind and help avoid unexpected repair costs. The contract includes annual or bi-annual maintenance visits to check, clean and update equipment, which can extend the life of the equipment, ensuring optimal performance. Our service team can also update asset serial number lists to maintain up-to-date records.

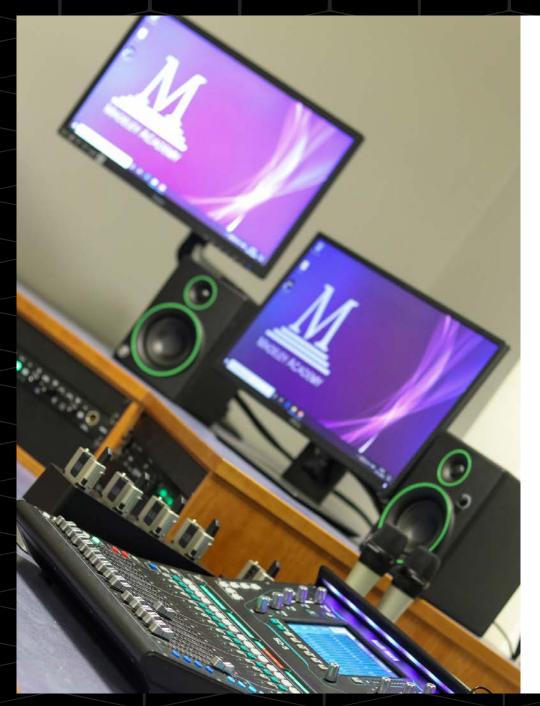

In addition to on-site support, we also offer a remote support service which includes troubleshooting and system maintenance, resulting in saving time and money for our clients.

Our exclusive Strive AV Customer Online Portal provides easy access to a range of useful assets, as well as the ability to raise, track and log support calls and download helpful documents.

We also offer training for clients to learn how to use the systems and equipment. This can be particularly useful for clients who are not familiar with the technology or have new starters. Our **upgrade service** provides a way to stay completely up-to-date with the latest technology updates. This can include upgrading software, hardware, or even entire systems to ensure seamless access to the most efficient and productive solutions available.

For a smart solution that works exactly as you need it to, our Integration Service allows clients to connect all audio and visual systems in one place. This can include integrating lighting, AV, security and room booking for example, to create a seamless experience.

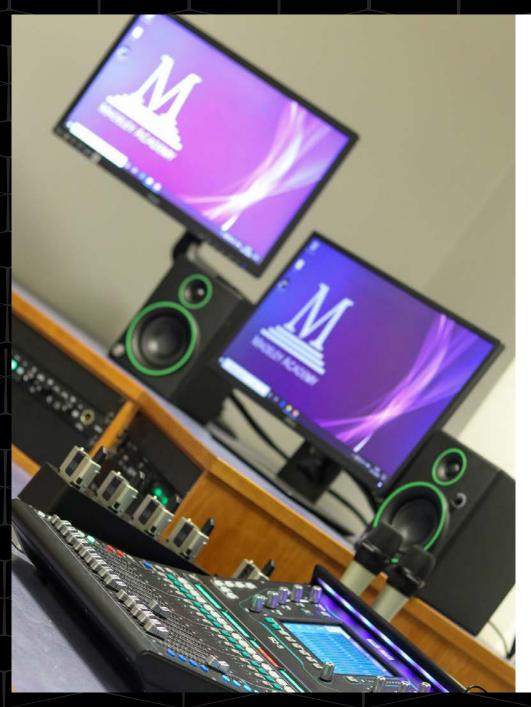

CONTROL SYSTEMS

With over 20 years of experience and deep roots within education and corporate sectors, Strive AV has a strong track record of providing excellent bespoke AV solutions. Our primary aim is to provide AV solutions that transform communication and enhance our end-user experience.

Within our wide range of excellent manufacturers, we ensure our AV solutions are founded in intuitive, reliable, and helpful technology, with well-programmed interfaces to ensure ease of user uptake.

Our highly qualified engineers are experts in designing and programming simple-to-use control systems, meaning that you can walk into any classroom or conference room and have it fully functional with the touch of a button. Our team has supplied a wealth of projects from a single room to multiple building-wide installations. Our estate-wide management can handle lighting, audio, and building control as well as environmental monitoring and booking options to streamline the process even further.

With manufacturer-led qualifications from AMX, Crestron, Extron and more, Strive AV can program and install control panels that will ensure the ultimate simplicity and effectiveness for end users.

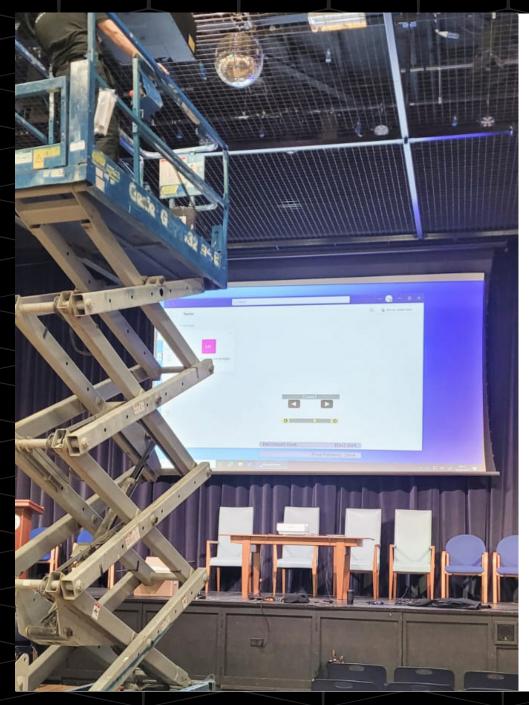

TRAINING

With a growing team of 33, our highly qualified experts have vast knowledge and real-world industry experience. We understand the challenges faced by companies when it comes to implementing new technologies, end user adaption, as well as operational confidence. Once all of which are mastered, they make up the essential factors to a successful installation and ensure you get the most out of the technology.

Taking on the challenge of adopting new products and work methods can be a daunting and complicated task, regardless of in-house technical knowledge. But in doing so, it will allow your organisation to thrive, your team to work more effectively, and provide your customers with a better service.

The world of technology and audio-visual is constantly evolving, with exciting developments and products. To openly welcome these changes, we can provide the reassurance you need through our expert training programme. Training is an essential ingredient for a successful user adoption and to reach the full potential of your new AV solution.

To ensure the Strive AV team can service clients and projects to the highest degree, we commit to on-going education, ensuring our team stay up to date with the latest industry changes, technologies, standards and requirements.

MAINTENANCE

At Strive AV we have a reputation for being dependable. Protecting your investments, saving you money, and reaching your goals is our motivation. Which is why we offer a wide range of aftercare support options to keep your systems operating smoothly.

Strive AV has a nationwide network of highly qualified on-call engineers who are committed to getting it right for you, every time. From our help desk support team to our dedicated field service engineers, we can manage every aspect of your AV to keep it running at peak performance.

Striving to be the most dependable resource in the AV industry, we will prioritise an effective strategy for your business to make your journey as easy as possible. Our tailored maintenance packages offer excellent value and help to prolong the lifespan of your AV, speak to your Strive AV Account Manager to find out more.

PROJECT MANAGEMENT

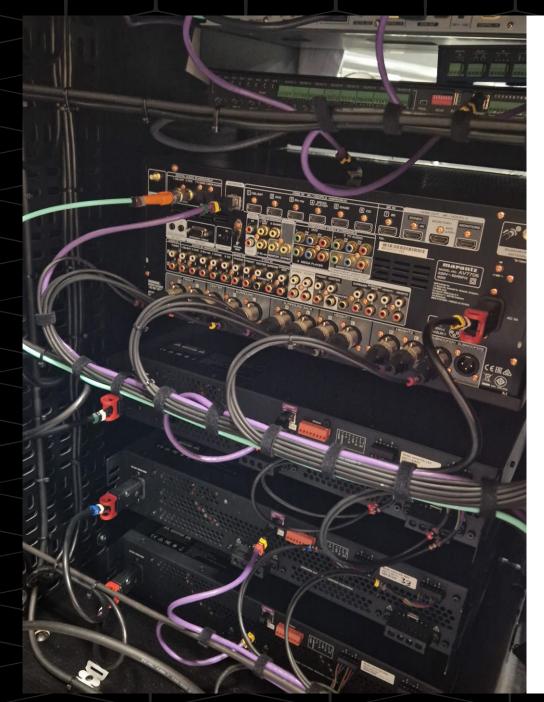

At Strive AV, our Project Management mantra is to drive standards and set the benchmark, every time.

Our technical project managers and solution architects are all PRINCE2 Practitioner certified, aligning their efforts to approve technology standards and implement our existing policies to meet your every requirement.

Engaging with your technology leadership teams and key stakeholders, we ensure standards are maintained throughout the project. Our ability to manage the process, while remaining agile in our response to challenges, is a critical part of our success in delivering your project on time and within budget. Our blueprint is based on best-practice guidelines – such as PRINCE2 project management methodology. From inception to transitioning into a live environment, your Strive AV project manager(s) focus on quality assurance and adherence to the highest standards that our clients have come to expect from us.

"We've been working with Strive AV for nearly 10 years and continue to use their specialist product knowledge and project management to complement our existing in house team for our larger projects. Strive have always ensured that deliveries are on time, projects plans are clearly communicated and organised and any potential problems along the way are resolved before they have an impact on project delivery."

Mike Ward. Group IT Director, The Dean Trust

RACK BUILD

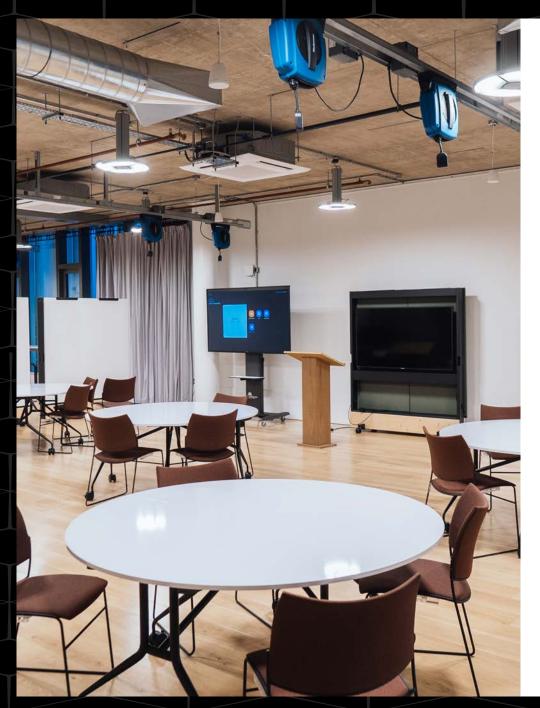

Our in-house rack build service is a complete gamechanger for clients. Many have come to reply on the speed and convenience provided by our highly skilled rack-build engineers.

Whatever your specification, our tailored rack build service will meet your precise requirements with a high-quality rack build to last. Racks are designed and built by our skilled engineers, in-house at Strive AV. We use the best quality materials to create robust racks that comply with industry standards. Whether you require your rack to slide out, rotate or become completely mobile on wheels – we can tailor a solution that works for what you need it to do.

This is all part of the service from Strive AV, meaning we can be fast, agile and adapt the rack build to any last-minute changes. Once your rack is completed, we'll then deliver it to site fully assembled, ready for our team to install and integrate.

"Here at the QEII Centre we have a great working relationship with the team at Strive AV. Their work ethic meets our highest demands, and the rack build service is bespoke to our needs."

Roman Turney, Head of Data and Video, QE11 Centre.

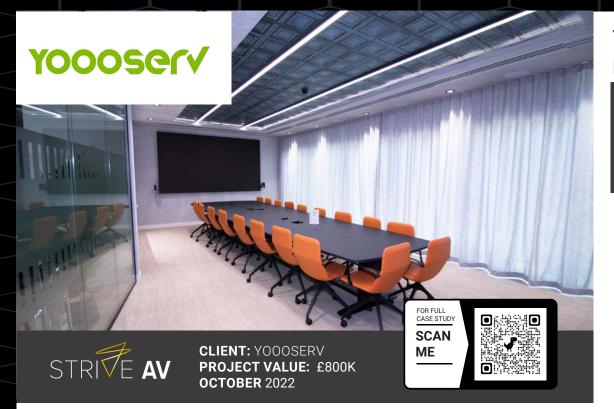

SYSTEM INTEGRATION

Our exceptional AV design and integration services cater for projects from the development phase all the way through to integration and ongoing maintenance.

Our vast knowledge of the AV design and integration process, coupled with the ability to interface and convey technology requirements, showcases our appreciation of the real-world application of technology.

Whatever your business needs, we have the experience and resource required for conceptual, one of a kind or complex AV design and fit-out In sync with our solutions architect / project manager and account managers, we ensure that every project has a huge presence, whatever its size.

Whether your project is a renovation, relocation, new construction or existing infrastructure upgrade, we'll work with you, your architect or general contractor to create an AV technology solution that is designed specifically for you and your target audience.

YOOOSERV SETS THE AV BENCHMARK FOR SERVICED WORKSPACES

Premium serviced office group, YoooServ, offers cutting edge technology to support the future of work at new 5* workplaces thanks to award-winning integrator, Strive AV

YoooServ provides high-end serviced offices and workspaces that can be tailored to the unique needs of every business. Home to high-profile brands and big corporate enterprise, YoooServ currently has four locations across the UK, two more opening next year. As part of its ongoing expansion plans, YoooServ acquired sites at No.5 Weybridge and The Abbey in Reading that required a full refurbishment. Strive AV was commissioned to specify and install a comprehensive AV solution that would provide seamless collaboration, high-quality meetings and on-point digital signage.

Being completely new locations, YoooServ needed the space to quickly attract new tenants with AV a top priority. The technology should enable people to instantly get on with the task in hand, from presenting plans online or connecting to a video call – the experience should be easy, fast, and high quality. From initial design to integration and support.

"I've worked with Strive AV in the past and they always manage to find a perfect solution." comments YoooGroup Chief Executive Officer, Benjamin Willmore. "It was important for the AV to compliment and seamlessly integrate with the meticulously designed office spaces,

and ensure ease and supportive equipment was available throughout our premium offices." Ease of use was a key factor, so that business could be done without any technical issues getting in the way. The team at Strive AV mapped a solution that would simplify the AV capabilities and usability within the building's communal areas, as well as meeting rooms, boardrooms, reception, and open spaces, to make it as intuitive as possible.

In each of the 15 meeting rooms there is a Top-Tec AV integrated collaborative table so users can get straight into a meeting with very little setup involved. An ultra-high definition 4k Samsung QMR smart screen sits at the head of each table, with a Logitech Rally Plus video conferencing solution for high-quality audio and camera.

Providing an impressive welcome for visitors, the reception areas are installed with LG LED wall solutions for digital signage, which can be tailored with bespoke messages. While in communal areas, the messages and branding reflect current campaigns from YoooServ and its high-profile tenants.

"Within our communal areas we wanted to have the ability to directly engage with tenants." Said Benjamin. "The high-spec screens provided by Strive AV allow us to update the content, easily and efficiently, with things like welcome messages for new tenants and company videos. Tenants navigating around the building see the digital signage and are then inspired to speak to that company, who just so happen to be in the same building."

The boardroom includes a Top Tec twenty-seater table and is intended for larger meetings, which required a large-scale display. Content can be shared in high resolution on the impressive LG 136" LED Wall, providing a superb viewing experience for those in the room or joining virtually. The boardroom features Logitech Tap video conferencing for Google, Microsoft and Zoom for a wide range of collaboration options. It also includes QSC Cameras and Tascam Mics, which cleverly track each presenter. The camera and mic will automatically follow the presenter, giving them freedom to move around the room. An in-ceiling audio system means virtual and in-room participants hear every word clearly.

A PREMIER MICROSOFT SIGNATURE TEAMS ROOM EXPERIENCE FOR COEO

When Microsoft Data and AI solutions company, Coeo acquired its new headquarters in Reading, it appointed Microsoft Office, 365 and Teams specialist Purify Technology to develop a smart workplace and oversee IT and software provision.

The key objective for the client was to reduce the requirement of time-consuming travel to meet face-to-face with prospective clients. As a partner of Microsoft, and with its new offices located on a Microsoft campus, Coeo also wanted to utilise Microsoft Team technology and was keen to install a Microsoft Signature Teams Room – a brandnew concept at the time of this project. Purify subcontracted Strive AV to specify and install the required AV technology for this specialist workspace. "We needed to plan strategically to ensure this project was at the forefront of Microsoft technology. As a result, Coeo is one the first companies in the UK to have a Signature Teams Room." explains Dave Prior-Jones, Co-founder and MD of Purify Technology.

"It's a fully inclusive teams experience, so participants can just enter the room and press 'Play' to begin. It's that simple. The meticulous design process resulted in a successful integration with which the client was very pleased."

As per the client brief, the Microsoft Signature Teams Room acts as a 'Digital Reception' for prospective customers, providing a striking first impression of Coeo and an exceptional hybrid meeting experience. The company uses the room to conduct high-quality remote introductions and demonstrate Coeo's Microsoft credentials. This has helped to win new business and save valuable time and travel expense.

In a break from the traditional meeting room, the screen is positioned on the longer wall of the Microsoft Signature Team Room. In-room participants sit along a fixed front-facing, curved table and are positioned face to face with remote participants on screen, as opposed to the traditional side-on view set-up used in most meeting rooms.

Working closely with the Purify team, Strive AV specified AV products that would work effectively with layout of the room and operate seamlessly with the requirements of Microsoft Teams Front Row software.

"The Microsoft Signature Team Room is set-up to provide an enhanced meeting experience for six participants, with an ultra-wide 21:9 screen which supports Microsoft Front Row collaboration software. To achieve this aspect ratio, we specified an ultra-short-throw (UST) Epson Pro Laser Projector which was positioned in close range on the floor and a dnp Supernova One 21:9 projection screen." Explains Toni Chalk, Managing Director at Strive AV.

A Jabra PanaCast 50 integrated camera and microphone sits at eyelevel, between the meeting table and screen. This positioning ensures each individual is picked up equally by the camera and microphone when they are speaking, so every participant feels like they're part of the meeting.

To reduce echo and enhance sound quality, the walls are fitted with sound-proofing panels. A Coeo-branded living foliage wall, which is strategically situated in the background behind in-person participants, also helps to reduce echo as well as providing an attractive and welcoming view for remote joiners. The living wall and office furniture are all carefully positioned in line with the Microsoft Teams Room 'view'.

CCCU OPTS FOR AVOIP SYSTEM

Following its successful work on Building 1 in 2019, Strive AV returned to Canterbury Christ Church University, during the height of the COVID-19 pandemic to implement an innovative £1.4m AV-over-IP system in Building 2, as transformation of the city campus continues.

Based in Kent, Canterbury Christ Church University is undergoing an extensive, multi-year redevelopment, creating contemporary spaces for learning, teaching and research that combines new buildings and existing spaces across the UNESCO World Heritage Site campus. Part of this £150 million investment is Building 2, which is home to science, technology, health, engineering and medicine courses. Canterbury Christ Church University's Building 2 project has seen the city campus transformed with a stunning new building featuring state-of-the-art facilities. The £65 million building brings together engineers, scientists,doctors and healthcare students in an inspirational learning environment, with industry-standard, high-tech facilities on each of its three floors. It provides space for research, experimentation, industry collaboration and so much more.

Strive AV's project brief was to implement an AV system employing the latest technologies to facilitate a new style of classroom learning.

Strive AV's design implementation of a new to market AV over IP system to sit on CCCU's existing network won approval from the client with project award in August 2020. This design negated the need in most spaces for traditional video switching and allowed teaching spaces to be joined together with ease, transmitting video, audio, control and USB to other classrooms, and potentially other buildings, from a single teaching space.

Strive AV's in-house infrastructure teams in conjunction with the technical project manager

and systems integration team worked with the client to advise on the network infrastructure required for an AV over IP system.

However, the first challenge upon arriving on site was that the network cable schematics deployed by the project management team at Canterbury Christ Church University wasn't followed by the contractor, leaving all floor connection points fed from different network switch stacks to the wall connection points in any given room. With this implementation, it would leave all multicast streams traversing the core,

threatening a level of network degradation (due to required bandwidth) unacceptable by the university. With the aid of the university's and Strive AV's infrastructure teams, a design was implemented to create a multifloor sister stack to combat this issue.

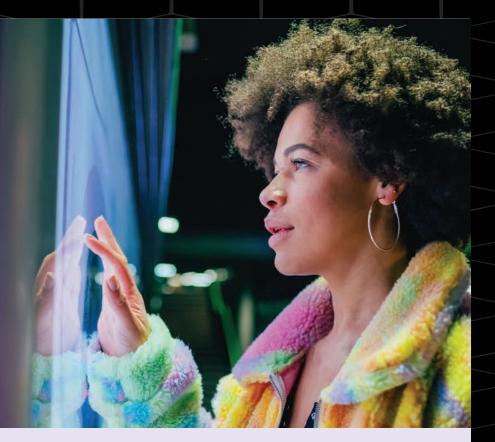

The new building opened in January 2021 and has already proved a valuable addition to the university estate. AV over IP technology has enabled Canterbury Christchurch University to maintain social distancing by using multiple classrooms to teach a single class of students, helping the university to continue to deliver the high-quality teaching and learning students expect, despite the challenges faced.

PROTECTION AT ALL POINTS OF CONTACT

Germ-resistant solutions

Germs can be transmitted through contact with contaminated surfaces. This is why BenQ is the first in the industry to offer germ-resistant interactive displays

BenQ displays feature the world's first germ-resistant touchscreen for large format displays, with official TÜV and SIAA certification.

The patented AgNP coating, antibacterial and non-toxic, eliminates 99.9% of the bacteria present on the treated surface within 24 hours, preventing the spread of germs.

RP03 interactive displays employ nano-ionic silver particles on the screen, front ports, pens and remote control to protect students and teachers across all points of contact.

*Available on the RP03 series

SCREEN

BUTTONS AND FRONT PORTS

Healthier classrooms for everyone

EASY ON THE EYES

Eye-Care solutions

Staring at screens for long periods of time may cause eye strain. To protect the eyesight of our users, all BenQ interactive displays have built-in eye-care technologies which have been certified by both TÜV and Eyesafe®.

Compared with traditional touchscreens for classrooms, BenQ interactive displays have multiple layers of hardware and software features designed to safeguard the vision of teachers and students as they use our displays during classes. These features include Low Blue Light, Flicker-free, Anti-glare and 4K UHD clarity.

Blue light emitted by screens is known to cause eye-strain. Our filter effectively minimises blue light emission, helping you create the hest and most comfortable viewing experience for teachers and students

FLICKER-FREE

Displays with low refresh rates often flicker causina dizziness and eye-strain during class. BenQ's flicker-free displays elimates this issue, guaranteeing smooth visuals every

ANTI-GLARE

When using displays for teaching, it's important for on-screen details to be visible. BenQ's anti-glare screens significantly reduce reflections, even in bright light conditions.

CLEAN AIR, ALWAYS

Air quality solutions

Classroom air quality has a direct effect on learning. Maintaining low levels of CO₂ and pollutants keep students alert, improves their cognitive ability, and protects their respiratory health.

To make learning easier, our displays are equipped with specialised air quality sensors* that monitor air quality in real time and indicate when it is time for school leaders to take the necessary steps to improve the air quality inside their classrooms.

The built-in widget in the display gives a real time reading of classroom air quality, while the DMS Dashboard shows the detailed summary over time.

As an additional health protection measure, the built-in air ioniser* releases negative ions in the immediate vicinity of the display, helping to purify the air and improve its quality.

The built-in air ioniser widget can actively release negative ions automatically or remotely via DMS.

*Available on the RP03 series

IMMERSIVE & SIMULATION

BenQ Projection Services

In Partnership with Strive AV

01. Solution Planning

Connect with our projection experts to share your AV and simulation project requirements.

02. Digital Setup

Our 3D modelling helps assess your space and recommend the perfect BenQ projector for your needs.

03. Installation Partners

Collaborating with Strive AV allows us to provide comprehensive hardware and software solutions, including multi-projector setups and edge blending.

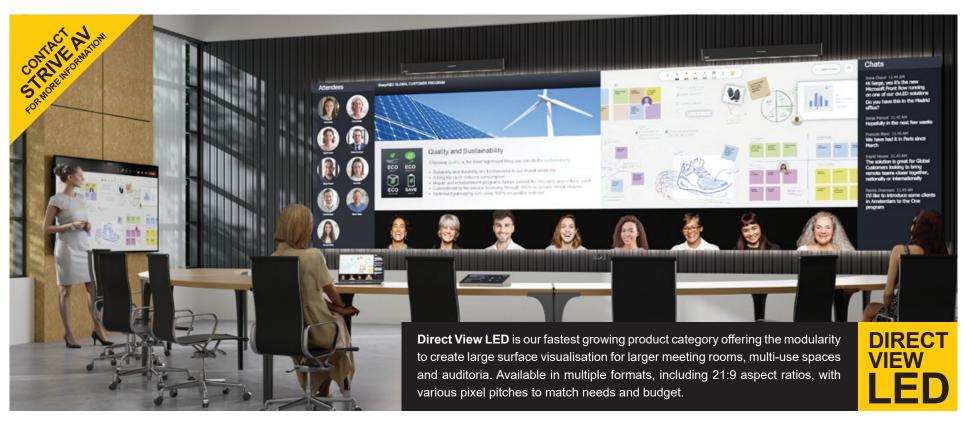

04. Aftersales Support

We are here for you even after your purchase. Our experts provide consultations and additional support.

Supporting corporate customers with the widest portfolio of sustainable display solutions, across multiple technologies, for a variety of applications and experiences.

Interactive & Collaborative Solutions enable both in-room and remote meeting participants to engage and collaborate, annotating content in real-time. Sizes from 55" to 86" diagonal, provide the appropriate screen estate for small to larger groups, many with USB-C connectivity supporting frictionless workflows.

Large Format Displays remain the go-to technology for impactful presentations in any size of meeting room, or for eye-catching digital signage applications. In sizes 32" up to a vast 98" diagonal, a high haze filter and brightness ensure content is clear even in brightly lit spaces.

SIGN IN SOLUTIONS

InVentry are the market leaders in visitor, staff and pupil management solutions. Trusted in over 7,000 schools, InVentry has helped many schools, colleges and universities streamline their sign in process. Not only do they offer sign in solutions, InVentry improves GDPR compliance and health and safety procedures with their many features.

INVENTRY NEW FEATURES

HEALTH DECLARATIONS

Send personnel and pre-booked visitors a health declaration to confirm they are not displaying symptoms of COVID-19

HOST READY NOTIFICATIONS

Allow pre-booked visitors to let their host know they have arrived via an email link. The host can then allow them into the building when it is safe to do so

CAPACITY MANAGEMENT

Receive notifications when capacity levels have been met, breached and back to acceptable levels to ensure everyone can keep that 2m distance.

ACCESS INVITATIONS

Give visitors the ability to open car park barriers and doors with Paxton Access Invitations while also ensuring a contactless sign in.

TEST AND TRACE

With InVentry you have the ability to know who is on-site at any given time. In conjunction with our Health Declarations, you have the ability to Test and Trace should a case of COVID-19 enter the building.

Ubiqisense

USE ENERGY ON PEOPLE NOT EMPTY SPACES

Ubiqisense's Al-driven vision sensors and cloud-based platform gathers information on activity in buildings, analyses and acts to reduce the energy consumption, optimize space utilization, nudge users to be conscious and optimizes cleaning so that companies can save big on energy, cleaning and real estate costs.

SPACE OCCUPANCY ANALYSIS

- User friendly Dashboard
- All sensor data into one interface
- Search across buildings, rooms, desks etc.
- Heatmaps
- Export data into CSV file

LAPTOP CONVENIENCE DESKTOP EXPERIENCE EXPAND YOUR CONNECTIVITY

The new Lindy Laptop Docking Station range is here!

It's hard to argue against the benefits of a desktop computer when using a 5k monitor, mouse, and full-sized keyboard. However, laptop portability is now a reality for modern hybrid working. The new Lindy Laptop Docking Station range gives you the best of both worlds. With a single USB-C connection you can view your laptop through multiple displays and use all your favourite USB accessories and peripherals. Plus, with built-in Ethernet you can also connect to your wired office network. When it's time to leave, simply unplug and you're good to go!

Contact your account manager today for more information on the Lindy Docking Station range.

WORKPLACE EXPERIENCE PLATFORM FOR THE HYBRID OFFICE

Is your office ready for the future of work?

Empower your people to do their best work, wherever they are. Book a day in the office, reserve a desk, schedule meetings, book rooms, greet visitors, reserve parking, schedule events, build community, grant door access and gain data-driven insights to optimise your workplace. Handle every aspect of your workplace management and become a more human-centric organisation in the processes.

Ubiqisense

Events

Create open or closed events with employees and external visitors, choose from virtual (with Teams integrations), internal, using existing event spaces or external and share invites via the app with automated emails and calendar sync.

Reception

Dedicated user type for reception staff allows for instant visibility of all data for a specific site. View and print reports on all day passes / visitors / meeting room bookings and vehicle parking that has been booked on a specific day or date range with option to cancel, edit or create new for all booking types.

Visitors

Whether you're wooing clients, partners or potential new employees, make their experience at your office slick, special and safe. Provide every visitor with a quick and easy check-in via the door access panel and dedicated reception kiosk using IOS and Android Wallet cards.

Secure a day pass for individual or multiple visitors, adding meeting rooms and parking all to one single booking. Send visitors a customised email with all the information they need ahead of their visit. When visitor signs in via the reception kiosk, the host will receive a notification on the app to inform them they have a visitor in reception.

Parking

Available for both vehicle and Bike shed management. Give users the ability to see in real time total number of parking spaces available for different types, including electric, motorbike and disabled. Set your parking default number for a site or floor to cap bookings for a given day. Close floors or whole sites to cancel any bookings for specific days.

Community

Improve employees' workplace engagement and create a c workplace experience app will let you easily send announc policies, benefits, and events distribute via bulletins, socia

<u>Social Wall</u> - Communicate freely on the wall, share ideas, comment on other users posts with ease. Create communito just colleagues.

<u>Colleague Request</u> - Send a colleague request to a friend a details such as location so you can co-ordinate your days in create communities.

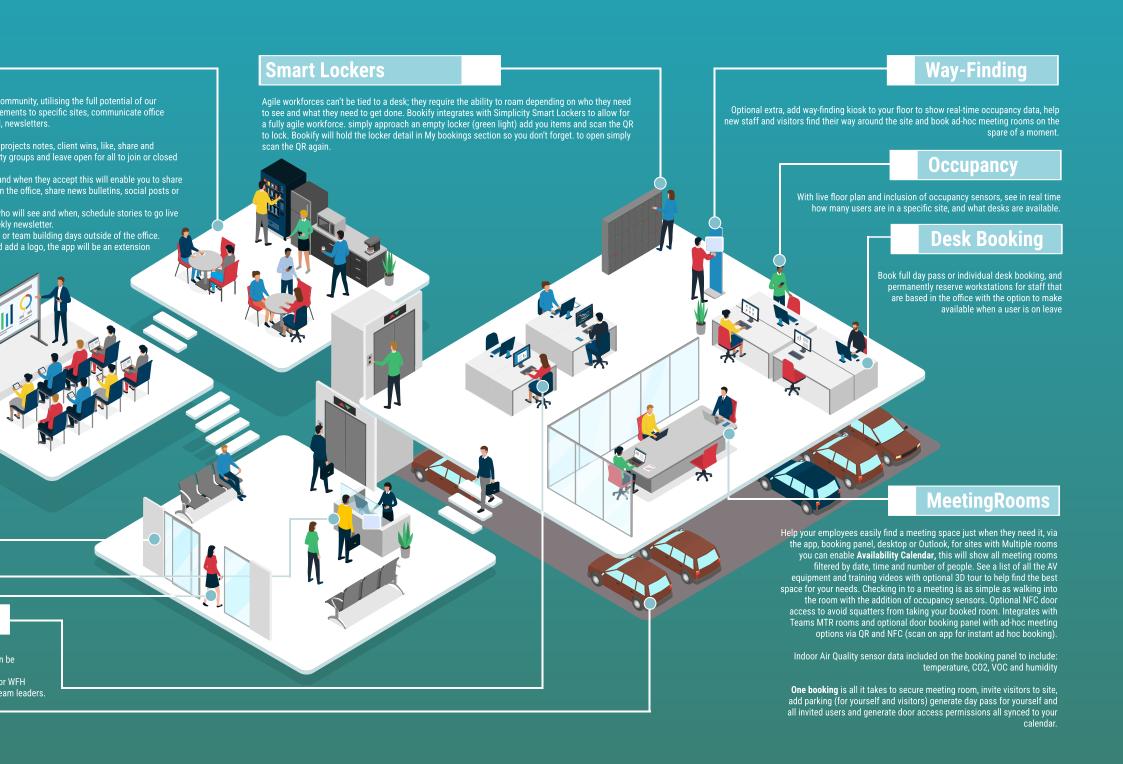

News Bulletins - Distribute internal news stories, choose wand if required schedule to unpublish. Add stories to a wee Events - Organise drinks after work, virtual Christmas quiz White Labelling - Brand the app in your custom colours and of your company.

Door Access

Using los and Android wallet cards staff and visitors can gain access to a site main entrance or meeting room using their phones. Set expiry on access for visitors or contractors, add permissions to include granting access for users that have booked a day pass, workstation, or meeting room bookings only.

Colleague Check-in

Utilising NFC and QR labels staff members can check-in to a workstation when they arrive, data is logged and report ca generated for time sheet. staff can check-out for lunch or an appointment and check out for the day. Optional Virtual desk ficolleagues, all data available in real-time for management or treatments.

MobileConnect System

Hear clearly. Respond effortlessly. Interact live.

MobileConnect is an innovative, scalable and smartphone-based audio accessibility solution that seamlessly connects you and your audience. It consists of three main components: The easily-integrated MobileConnect Station, the smartphone-based MobileConnect App (available for iOS and Android), and MobileConnect Manager.

sennheiser.com/mobileconnect-smartphonehearing-system-app

Great sound starts with a great sounding space, but not all rooms are acoustically desirable in their natural state. As a matter of fact, it's rare for an untreated room to be free of annoying room anomalies such as reflections, flutter echo, standing waves and resonances.

Whether it's a recording studio, home theatre, boardroom, or any other medium-sized space, a Primacoustics London Room Kit is the perfect solution for controlling sound when and where you need it.

AV MOUNTS, **DESIGNED AND MANUFACTURED** IN THE UK.

Universal Serviceable Cassette Mount Range

This diverse wall mount range consists of vertical or horizontal slotted sliding cassettes that can be populated with AV peripherals. The VertiSlide Serviceable Cassette Mount range consists of wall fixed screen mounts with vertical or horizontal sliding & detachable slotted racks for mounting AV equipment.

There are various models for different screen sizes (46-110"). The equipment is neatly and safely hidden behind the screen. Depending on the model, in the event of a swap out the rack can be unlocked, pulled out and detached if necessary.

An under desk version is also available. When installed the equipment is hidden under the desk via a hinged slotted removable rack but in the event of a swap out the rack can be unlocked, hinged down and detached if necessary. This product also features an easy close counterbalance mechanism.

NEW! Ceiling VC Streaming Kit

Ensure students never miss a lesson or lecture again with the latest ceiling suspended video conference camera and screen kit. Record and live stream the lecture to students who are unable to attend.

Designed as an all-in-one suspension solution, this kit comes with a universal mount for small screens, dedicated video camera mount, ceiling plate and 1000m column.

Polycom Studio Camera

The Mentor Lecturer's Desk

Perfect for smaller lecture halls whilst still providing lecturers with a professional central desk facility. Change lighting, audio, content and video sources from one place. All cabinets have 19" removable 12U racks with an additional 1U vertical rack featured in the leg. Comes with a control housing and monitor arm as standard. Available in a range of table top finishes and
