STRIVE AV

AV TECHNOLOGY

SOLUTIONS 2024/25

We are Strive AV

Hello and welcome! At Strive AV, we're passionate about technology and work with the leading industry brands to deliver the very best solutions for our customers.

In our 2024/25 technology product guide, created in partnership with our key brand suppliers, we are excited to share the latest and greatest technologies making an impact in the corporate and education sectors.

Every product in this guide has been handpicked by Strive AV, based on its performance, quality, and user-friendly operation, to provide you with the audio-visual solutions required to build a robust future.

For more information on any of the products featured, please don't hesitate to get in touch via email: sales@striveav.com or phone: 01342 649 575.

Toni Moss
Managing Director

SUPERIOR SERVICES

Strive AV is committed to excellence, consistently exceeding expectations by delivering professional and outstanding services to our clients.

Our **Maintenance Contracts** offer peace of mind and help avoid unexpected repair costs. The contract includes annual or bi-annual maintence visits to check, clean and update equipment, extending its life and ensuring optimal performance. Our service team can also update asset serial number lists to maintain up-to-date records.

In addition to on-site support, we also offer a **remote support** service which includes troubleshooting and system maintenance, resulting in both time efficiency and financial savings for our clients.

Our exclusive Strive AV Customer **Online Portal** provides easy access to a range of useful assets, as well as the ability to raise, track and log support calls and download helpful documents.

We also offer systems and equipment training for clients. This can be particularly useful for clients who are not familiar with the technology or have new starters.
Our **upgrade service** provides a way to stay completely up-to-date with the latest technology updates. This can include upgrading software, hardware, or even entire systems to ensure seamless access to the most efficient and productive solutions available.

For a smart solution that works exactly as you need it to, our **Integration Service** allows clients to connect all audio and visual systems in one place. This can include integrating lighting, AV, security and room booking, to create a seamless experience.

CONTROL SYSTEMS

Boasting two decades of unparalleled experience, Strive AV holds an envied position in both the educational and corporate sectors. Renowned for providing exceptional custom AV solutions, our foremost goal is to revolutionise the way our clients communicate and elevate the overall user experience.

Thanks to our wide range of excellent manufacturers, we ensure our AV solutions are founded in intuitive, reliable, and helpful technology, with well-programmed interfaces to ensure ease of user uptake.

Our highly qualified engineers are experts in designing and programming simple-to-use control systems, ensuring seamless operation of classrooms and conference rooms technology with the touch of a button. Our team has supplied a wealth of projects from a single room to multiple building-wide installations. Our estate-wide management can handle lighting, audio, and building control as well as environmental monitoring and booking options to streamline the process even further.

With manufacturer-led qualifications from AMX, Crestron, Extron and more, Strive AV can program and install control panels that will ensure the ultimate simplicity and effectiveness for end users.
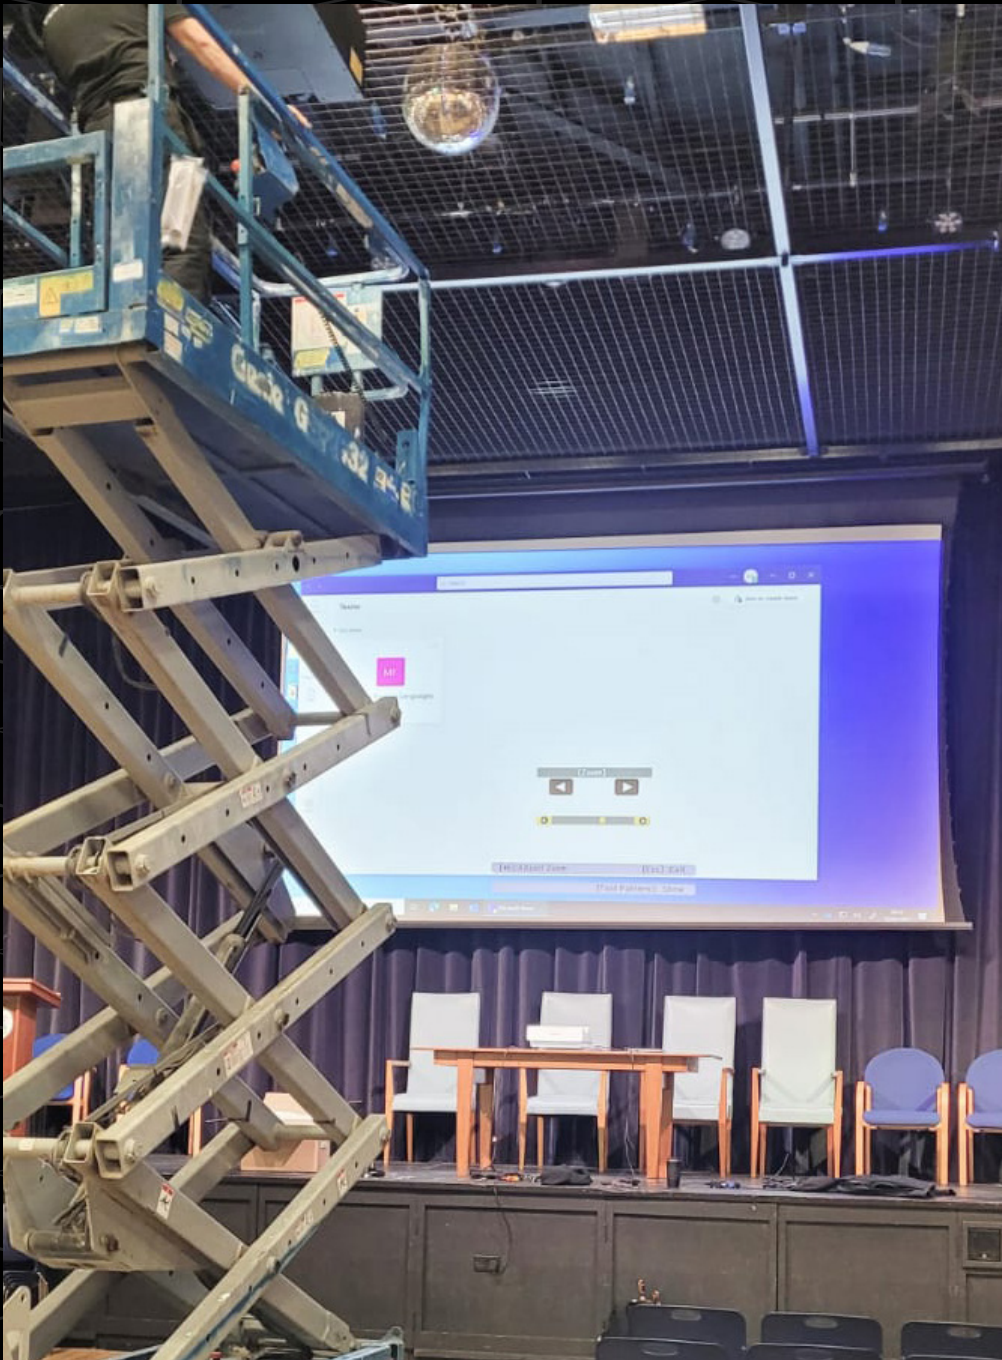

Our services:

TRAINING

> **Our team comprises over 30 highly skilled professionals who bring extensive expertise and a wealth of real-world industry experience to the table. We understand the challenges organisations face when adopting new technologies, such as user adoption and operational confidence. Mastering these critical elements is key to successful installation, ensuring you get the most out of the technology.**

Taking on the challenge of adopting new products and work methods can be a daunting and complicated task, regardless of in-house technical knowledge. But in doing so, it will allow your organisation to thrive, your team to work more effectively, and provide your customers with a better service.

The world of technology and audio-visual is constantly evolving, with exciting developments and products. But in doing so, it will allow your organisation to thrive, your team to work more effectively, and your customers to receive a better service. Training is an essential ingredient for a successful user adoption and to reach the full potential of your new AV solution.

The world of technology and audio-visual is constantly evolving. To ensure you can wholeheartedly embrace these transformations, we offer unwavering support via our specialised training programme. Our expert-led sessions are meticulously designed to elevate your confidence and expertise, ensuring you reap the maximum benefits from your new AV solution.

MAINTENANCE

At Strive AV we have a reputation for being dependable. To safeguard your investments and maximise your cost savings while you pursue your objectives, we provide a comprehensive suite of aftercare support options designed to ensure your systems function smoothly.

Strive AV has a nationwide network of highly qualified on-call engineers who are committed to getting it right for you, every time. From our help desk support team to our dedicated field service engineers, we can manage every aspect of your AV to keep it running at peak performance.

Striving to be the most dependable resource in the AV industry, we will prioritise an effective strategy for your business to make your journey as easy as possible. Our tailored maintenance packages offer excellent value and help to prolong the lifespan of your AV. Speak to your Strive AV Account Manager to find out more.

PROJECT MANAGEMENT

At Strive AV, our Project Management mantra is to drive standards and set the benchmark, every time.

Our technical project managers and solution architects are all PRINCE2 Practitioner certified, aligning their efforts to approve technology standards and implement our existing policies to meet your every requirement.

Collaborating closely with your technology leaders and key stakeholders, we uphold rigorous standards throughout the project. By managing the process with precision while adapting swiftly to any arising challenges, we can uphold our track record for delivering your project on time and within budget. Our strategy follows industry best practices, using the PRINCE2 methodology. From start to finish, our dedicated Strive AV project managers prioritise quality, always meeting our clients' expectations.

"We've been working with Strive AV for nearly 10 years and continue to use their specialist product knowledge and project management to complement our existing in house team for our larger projects. Strive have always ensured that deliveries are on time, projects plans are clearly communicated and organised and any potential problems along the way are resolved before they have an impact on project delivery."

Mike Ward. Group IT Director, The Dean Trust

RACK BUILD

Our in-house rack build service is a complete gamechanger for clients. Many have come to reply on the speed and convenience provided by our highly skilled rack-build engineers.

Whatever your specification, our tailored rack build service will meet your precise requirements with a high-quality rack build to last. Racks are designed and built by our skilled engineers, in-house at Strive AV. We use the highest quality materials to create robust racks that comply with industry standards. Whether you require your rack to slide out, rotate or become completely mobile on wheels – we can tailor a solution that works for you.

This is all part of the service from Strive AV, meaning we can be fast, agile and adapt the rack build to any last-minute changes. Once your rack is completed, we'll then deliver it to site fully assembled, ready for our team to install and integrate.

"Here at the QEII Centre we have a great working relationship with the team at Strive AV. Their work ethic meets our highest demands, and the rack build service is bespoke to our needs."

Roman Turney, Head of Data and Video, QE11 Centre.

Our services:

SYSTEM INTEGRATION

Our exceptional AV design and integration services cater for projects from the development phase all the way through to integration and ongoing maintenance.

Our vast knowledge of the AV design and integration process, coupled with the ability to interface and convey technology requirements, showcases our appreciation of the real-world application of technology.

Whatever your business needs, we have the experience and resources required for conceptual, one of a kind or complex AV design and fit-out. In sync with our solutions architect / project manager and account managers, we ensure that every project has a huge presence, whatever its size.

Whether your project is a renovation, relocation, new construction or existing infrastructure upgrade, we'll work with you, your architect or general contractor to create an AV technology solution that is designed specifically for you and your target audience.

BUSINESS SCHOOL
UNIVERSITY OF SUSSEX

STRIVE AV

CLIENT: UNIVERSITY OF SUSSEX
PROJECT VALUE: £450K

HELPING UNIVERSITY OF SUSSEX STUDENTS FIND THEIR WAY WITH AV TECHNOLOGY

In an initiative to modernise and enhance the student experience through digital communication, The University of Sussex Business School partnered with Strive AV to develop a state-of-the-art display solution for their large atrium space.

The University of Sussex, recognised as a bastion of academic and research excellence, has always sought to remain at the forefront of innovation and student engagement. Part of its mission involved updating the outdated and ineffective signage system that was in place in the atrium of its Business School. This area, frequented by a large proportion of the student body, was inadequately served by a solitary 50" display screen, which failed to effectively communicate essential information such as news, events, and classroom locations.

In pursuit of a solution that would answer the increasing complex communication needs of a vibrant university, the Sussex Business School sought proposals for a solution that encompassed a video wall and an interactive wayfinding totem. The primary goal was to capture the attention of the staff and students and provide them with easy access to timely and relevant information.

The primary challenge faced by Strive AV was to design a system that was not only visually striking and capable of withstanding the high footfall of the atrium, but also one that was intuitive enough for students and staff to interact with. The solution needed to be both a source of information and a visual landmark within the Business School.

Strive AV took a collaborative approach to the project, working directly with stakeholders at the Sussex Business School to understand and tailor their proposal to the unique demands of the space. They recommended and installed a cutting-edge 3.6m wide dvLED display wall that ensured visibility from all angles of the atrium.

The implementation of the digital solutions by Strive AV was an instant success:
• Visibility of key information improved significantly, with students and staff interacting with the new systems positively.
• The digital poster and video wall became central fixtures, contributing not only to the distribution of information but also to the aesthetic and modern appeal of the atrium.
• The installation was completed within a three-day period, minimising disruption to the school's operations.
• At a final project cost of £450,000, the investment marked a commitment by the University of Sussex Business School to improve student and staff experience through technology.

Through this project, Strive AV has not only enhanced the way information is disseminated within the Sussex Business School but also cemented its reputation as an innovative integrator capable of delivering complex AV solutions within the education sector.

BOOSTING CREATIVE COLLABORATION AT THE ROYAL COLLEGE OF ART

Strive AV worked with RCA to supply an upgraded AV solution across multiple campuses, including a brand-new Battersea campus, that would meet the needs of students and educators now and into the future.

The university had clear objectives that Strive AV needed to deliver on. Firstly, RCA wanted the AV experience to be consistent across all campuses, for teaching staff and students, as well as those managing the equipment. It was also important for this consistency should also apply to students joining classes remotely to support hybrid learning.

In addition, RCA aspired for its open-plan studios to provide a more adaptable, multipurpose environment that could be easily re-configured depending on how the space was being used.

CLIENT: ROYAL COLLEGE OF ART
PROJECT VALUE: £520K

RCA value being able to create a collaborative and inclusive learning experience between in-person and online students. Strive AV was tasked with delivering the ideal solution across the university's three campuses, whilst causing as little disruption to the students' learning as possible - completing the full install across all campuses in 12 months.

In total, 130 D7 interactive displays with custom protective screen frames, were deployed across the three campuses, fixed to Top-Tec Nova trolleys. The trolleys create mobile AV stations which can be used for pop-up huddle spaces, moved between classrooms, or to curate multipurpose zones in open plan spaces. The mobile solutions are made even more user-friendly with the DTEN D7 plug-and-play capability, which negates the requirement for technical support during set-up and empowers educators to confidently engage with AV as a tool in their lessons.

To meet these objectives, Strive AV specified a DTEN D7 all-in-one-video conferencing solution. Working closely with DTEN and RCA, Strive AV facilitated a small-scale trial of the solution ahead of the full installation. This gave RCA a chance to experience the quality, functionality, and performance of the DTEN D7 to ensure it was the right choice.

The DTEN D7 includes inbuilt features that support high-quality collaboration and hybrid learning, such as the 4k HD camera which broadcasts sharp, clear video. The 16-microphone array and propriety DSP from DTEN, keep voices clear and eliminate background noises for audio clarity. Teaching staff can easily begin lessons thanks to the one-touch meeting start feature, which also provides seamless screen sharing.

With 4k resolution content sharing, images, text and video can be displayed with clarity and crispness, essential for students to fully engage with content to support their learning. The tenpoint capacitive touch technology allows multiple users to interact and annotate with a piece of content simultaneously. This empowers students to engage in more productive group discussions and brainstorming sessions. For hybrid participants, this ultra-responsive whiteboard feature can easily integrate with other devices such as laptops, tablets, and smartphones.

"This solution has provided our academics with flexible teaching possibilities, while supporting a hybrid approach to learning. The knowledge both Strive AV and DTEN have of the education sector is fantastic, they understood what we're trying to achieve and the
direction of teaching methodologies. They've helped us meet the needs of our academics as well as the expectations of our students." - James King, Head of IT, RCA.

PICTURE PERFECT EXPERIENCE CENTRE

The Fujifilm House of Photography, based in London's Covent Garden, is the Japanese company's first ever experience centre. Spread over three floors it is designed to inspire and encourage visitors to get creative and immerse themselves in the world of photography – from picture taking to picture making.

The idea behind the centre is to encourage creative collaboration and photographic excellence, the store features various areas dedicated to different parts of the Fujifilm brand, including a basement lounge for its club members, a boutique for its GFX camera range, as well as selfie pods, free-to-use photography studios, space for workshops and much more.

To achieve this, StriveAV was called in to work alongside specialist AV and information technology consultant SM&W, which was selected for this project by Landmark Building and Property Services.

CLIENT: FUJI FILM
PROJECT VALUE: £28K

Designed as a new store concept, visitors are encouraged to use the space to create vlogs & blogs, have cameras cleaned & serviced, hire professional studio space as well as get help choosing products.

In order to create a unique space that caters for professionals, enthusiasts & amateur photographers alike, all while showcasing the best technology that Fujifilm has to offer, a high-end fit out was required and the background music system was deemed crucial to creating the right ambience.

The goal was to deliver an immersive sound system covering all 700sqm of the House of Photography. Aesthetics were key across the eight individual, yet combinable, zones of audio & a robust wireless microphone solution that covered all floors was needed.

The overall quality of audio output was paramount to the project, so Strive AV specified QSC loudspeakers, subs & head end, & a Shure QLX-D wireless microphone system. SM&W's information technology team delivered the structured cabling solution supporting the LAN, EPOC, CCTV, WiFi & video displays throughout the centre.

The biggest challenge was designing an audio system that could offer high-quality coverage across such a large area while being flexible enough to handle the wide range of events and activities planned for the House of Photography.

The QSC system was chosen for its ease of configuration and operation along with its ability to deliver high-quality audio from various sources routed to multiple zones. In addition, the robust RF performance of the QLX-D digital wireless system from Shure ensured reliability even when operating on a crowded spectrum.

The House of Photography has received unanimously positive reviews, with the Fujifilm team praising the rich and immersive audio experience throughout the experience centre, as well as the clarity, power and coverage of the system.

"I am hugely excited to open the doors and welcome members of the public to the Fujifilm House of Photography. We believe we have created a true photography playground – a unique experience for anyone with an interest in taking photos and sharing the world around them, be that a complete novice or a professional." - Theo Georghiades, Project Leader, FUJIFILM House of Photography London, and General Manager of Electronic.

INDOOR | digiLED NANO series

SUPER-THIN HD DIRECT TO WALL COB & SMD LED PANELS

> Unprecedented brightness with up to 1,000 nits.

> Ultra fine pixel pitches available, down to 0.7mm allowing for 4k screens in smaller dimensions

> Super energy efficient options powered by digiLED ZEUS ®

> Easy & safe installation with front access maintenance

> Robust Chip on Board(COB) technology

> Direct to Wall mounting, no brackets/structure necessary

> 16:9 aspect ratio screen enabling hd and 4k resolution

Visit our showroom near Dorking to see for yourself

digiLED
THE LED SCREEN EXPERTS

INDOOR | digiLED digiTHIN HD MAX series

> Latest flip chip common cathode technology

> Exceptional contrast ratio

> Low consumption, for example pixel pitch 1.5mm, 900 nits, 185W Max power

> Compatible with Novastar, Brompton, Quantum, so perfect for control rooms, design studios, XR Studio, etc.

> Super energy efficient options powered by digiLED ZEUS ®

> Direct to Wall mounting, no brackets/structure necessary
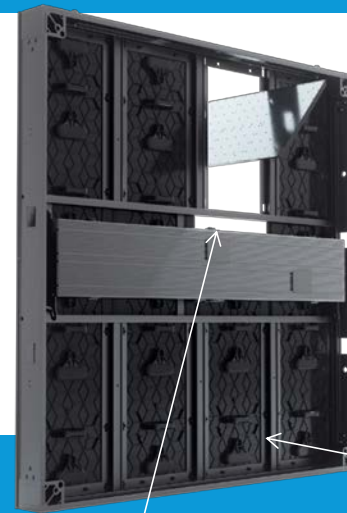

> 16:9 aspect ratio screen enabling HD and 4k resolution

Visit our showroom near Dorking to see for yourself

OUTDOOR | digiLED VISION series

> Super energy efficient - powered by digiLED ZEUS ®

> highly-reliable low temperature operation

> Air conditioning not required even in hot countries

> Simplified installation and easy maintenance

> Seamlessly wrap screen around a building

> Robust and reliable design

> Fully certified for use in public spaces

> Up to 10,000 nits brightness

Hidden panel jumper cables
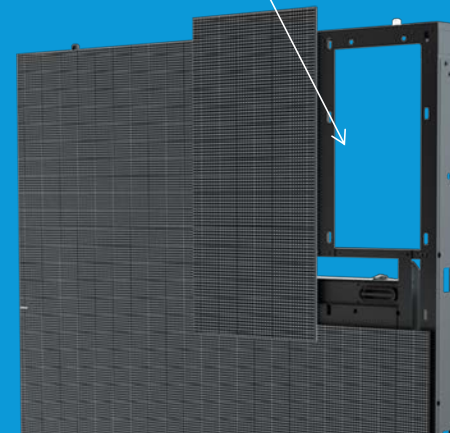

Cable-free connection between tile and frame

Full front and/or rear access
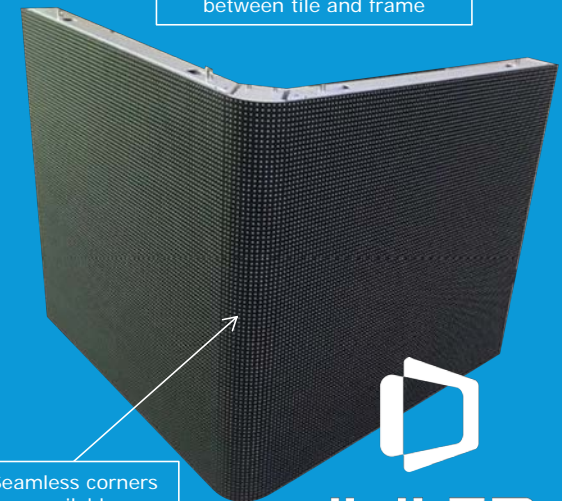

Seamless corners available

UNDISPUTED MANCHESTER REOPENS 11.11.17

digiLED MIRAGE
for transparent screens

> Great for shop windows

> Allow natural light into the building

> Simple installation

> Can build curving screens, even full 360 degrees

> Lightweight and outdoor-brightness-capable

digiLED
THE LED SCREEN EXPERTS

digiLED ZEUS ®

Ground-breaking power management technology designed to eliminate black screen power consumption, thereby reducing carbon emissions and saving money.

Most LED displays are left running on black, even when no image is shown, because of inrush current and the risk of power tripping when they are powered back on.

Offered as an optional addition to any digiLED LED panel, digiLED ZEUS® solves this problem entirely by allowing the screen to be fully powered off without risk, significantly reducing the cost of ownership of LED displays.

digiLED
THE LED SCREEN EXPERTS

uniguest

Connected Content. Deployed Everywhere. Engaged Audiences.

Uniguest is the most trusted provider of digital engagement and digital signage technology for guests, residents, customers, students, patients, fans, and employees in the markets we serve; engaging audiences in a secure way.
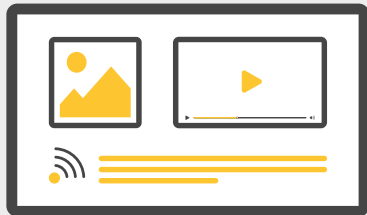

Digital Signage

Uniguest Digital Signage is a powerful, yet easy-to-use solution to drive engaging digital communications.

Uniguest's Interactive IPTV solutions provide sleek, smart, and mobile-friendly live TV & radio delivery.
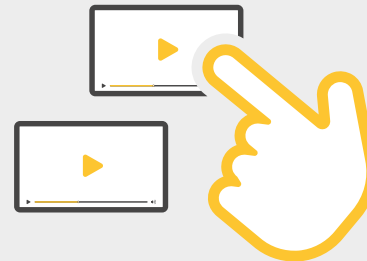

Video-on-Demand

Uniguest's Media Library is a central hub for storing, sharing and creating video-based resources.

Lecture Capture

Uniguest's Lecture Capture tools allow organisations to live stream, record and archive lectures and more.

LED Displays
Brighten every moment

Flip chip COB

Flip-chip COB boosts luminous area, energy savings, and temperature reduction by eliminating wire-bonding step

Common cathodes

Common cathode powers each RGB LED separately, enabling accurate voltage distribution and reduced power consumption

Aluminium cabinets

Aluminium cabinets protect LED displays with excellent heat dissipation for prolonged component lifespan

Intelligent energy-saving engine

Enhances images with pixel-level clarity and intelligent analysis for optimal display quality

HIKVISION®

LED All-in-one Displays

108 inch & 135 inch

▶ Flexible installation, and screen size for various scenarios

▶ Built-in dual system (Android and Windows), and loudspeaker

▶ Outstanding display and projection for effective communication

▶ HOB technology enhances protection with lower dead lamp rates

LED Poster Display

P1.5

▶ Ultra thin design, flexible screen size, easy installation

▶ Up to 10 self-splicing screens with only HDMI cables

▶ Built-in controller and information display system for easy advertising

▶ HOB tech ensures reliable protection

Indoor LED Displays

600 x 337.5 mm

▶ Flip-chip COB, enhanced display effect, and better protection

▶ Low power consumption

▶ Contrast ratio up to 18,000:1, & brightness 1,000 nits

Configurations

1920 x 1080	6x6 – 163" – P1.8	8x8 – 217" – P2.5
4K	6x6 – 163" – P0.9	8x8 – 217" – P1.2

Outdoor LED Displays

P6, P8, P10

960 x 960 mm

▶ Supports operation without air conditioning below 60° C

▶ Up to 50% energy saving

▶ Protection IP67 (front) and IP66 (rear)

▶ Front and rear maintenance

▶ Up to 10,000 nits to ensure high brightness with less brightness degradation

P2.9, P3.9, P4.8

500 x 500 mm / 500 x 1000 mm

▶ Fine-pitch LED with great display effects

▶ Free splicing between large and small cabinets

▶ Up to 30% energy saving

▶ Supports operation without air conditioning below 60°C

▶ Up to 6,000 nits with less brightness degradation

▶ Protection IP66 (front and rear)

SAMSUNG

Unlimited learning possibilities

Introducing the Interactive Display WAD series that provides an engaging educational experience, made for teachers.

The Interactive Display WAD series is based on Android OS and provides a familiar and intuitive user experience.

You can download and use major educational apps from Google Play. Additionally, major Google services such as YouTube and Chrome are installed by default and can be used immediately.

WAD Interactive Displays

Made for teachers in the classroom

Android 13 with Google EDLA

With a familiar user interface the WAD series brings together the power of Android with the full Google suite including access to the Play store for easy installation of your favorite apps including Google Classroom and Drive

Teacher Tools and Widget Bank

Make use of simple and useful tools to help in the classroom including onscreen time, stopwatch, Freeze screen and screen recording. You can also carry out surveys and voting on student devices to create an engaging and rich learning environment

Powerful Screen Sharing

Users can share up to nine screens at once in real time for maximum productivity. With this feature, content can be shared both ways between the large display and individual devices to engage every student.

Support iOS, MAC OS, Windows, Android & Chromebook

Teacher login with individual profiles and settings

Simple login for teachers to personalize their home screen and provide easy access to personal cloud storage from Google Drive and Microsoft One Drive. The profile is saved in the cloud so can be customized in any classroom

Multi-point Touch Drawing

Multiple users can write and draw on the whiteboard at the same time. WAC series enables multi-touch for up to 40 people for enhanced interactivity and productivity.

Device Management

A device management solution is essential to advancing educational environments. This solution optimizes the remote management of whiteboard settings and apps, guaranteeing operational efficiency and stability.

ViewSonic®

Solutions for Large Venues

Foldable All-in-One LED Display

Introduced as the industry's first 135" All-in-One Direct View LED Display Solution Kit with foldable screen, the LDS135-153 is an ideal rental-ready solution for events, exhibitions and other short-term uses. Its pre-assembled design means it can be quickly setup minutes and its foldable screen and built-in height adjustable stand make maintenance easy and transportation efficient. The IP54-rated LED modules also utilise specialist Glue-on-Board (GOB) surface treatment technology to protect against collisions, dust, and moisture during installation and use.

Efficient Transportation

The foldable screen reduces the flight case's packaging by nearly 50% compared to previous generation and allows it to fit into a standard lift for swift transportation.

Visual Clarity

The large 135" screen is ideal for larger-than-life images with a lightning-fast 3,840 Hz refresh rate and Cinema SuperColor+ Technology for life-like colours.

Impressive Audio

Immersive sound is delivered through studio-grade Harman Kardon speakers and dual 20W sets of professional passive radiators, woofers and tweeters.

Reliable Operation

It's designed for reliable long-term 24/7 usage and allows for content to be managed wirelessly through the pre-installed ViewBoard® Cast application.

Customisable LDC-031 Series

This innovative, customisable All-in-One LED display offers flexible sizing and effortless installation.

It can be easily combined with the LDC031 cabinet to create video walls in diverse aspect ratios and sizes for compelling digital signage. Its Glue-on-Board (GOB) technology also protects against collisions, dust, and moisture.

Cost-effective LDM Series

This series of All-in-One Direct View LED displays make ideal centerpieces for large spaces with their exceptional picture quality, impressive size options and easy installation features at an affordable price.

The Glue-on-Board (GOB) technology ensures longegivity with protection against collisions, dust, and moisture during installation and use.

Solutions for Videoconferencing

TeamJoin™

ViewSonic TeamJoin™. is an affordable one-touch videoconferencing solution that transforms any room into a streamlined hybrid meeting space. Certified for Microsoft Teams Rooms, this solution includes a computing engine, touch console, and video bar system to simplify setup. It also integrates with ViewSonic's expansive display offerings to deliver a comprehensive, cost-effective audio-visual collaboration experience.

TRS10 Bundle

Computing Engine
- Intel® 12th generation Core™ processor
- Delivers additional security features, including Intel® Threat Detection Technology and Control-Flow Enforcement

iiSignage² | iiSIGNAGE²
A CLOUD-BASED CMS SOFTWARE

iiSIGNAGE²
4 SIMPLE STEPS TO REACH YOUR AUDIENCE

STEP 1
UPLOAD CONTENT
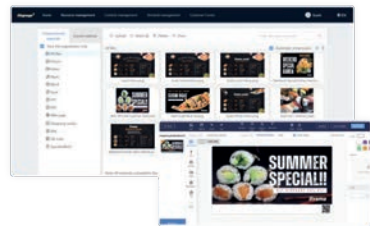

01. Upload multiple types of media (Image, Video, Web Content) to your resource library

02. Videos/QR codes/Web Content can be embedded into Images/Slide show of Images

03. Create distinctive Content programs with the media uploaded

STEP 2
SCHEDULE PROGRAMS

01. Schedule Content based on days of the week, any date and time in advance

02. Add different content programs to the schedule based on any requirement

**03.** Individual displays can have their own schedules set with the location's specific content programs

STEP 3
SHARE ON DISPLAY

01. Each of the displays can be identified by its specific name and can be grouped together based on indiviual requirements

02. The displays have their individual/grouped schedules for the uploaded content

03. The displays can be programmed to shut down and turn on based on your schedule

STEP 4
DAILY MANAGEMENT
01. Get regular/ timed screenshots of the content running on your screens.

02. Stay up to date on what programs are assigned to the screen and get real time screenshots of what is running on the display.

neat.

Beautifully simple video devices.

Neat devices address all types of meeting spaces throughout today's ever-evolving modern workplaces, people's homes and other premises. That includes open plan areas, physical meeting rooms, social zones, makeshift home offices, you name it. They are purpose-designed for Microsoft Teams and Zoom, enabling higher efficiency, well-being and social interaction to maximize the creativity, productivity and culture of your distributed teams.

Neat Bar

Neat Bar is a simple, compact, capable meeting room device that provides all the essentials for high-quality video meetings. It works brilliantly for focus or huddle spaces.

Neat Bar Generation 2

Neat Bar Generation 2 delivers extraordinary audio and video quality in an all-new, elegant, streamlined design for meeting spaces supporting up to ten people. It builds on our unwavering commitment to providing simple, powerful, clutter-free video devices.

Neat Bar Pro

Neat Bar Pro offers outstanding audio and video with our most advanced technology. It provides equitable meeting experiences inside larger rooms, supporting up to three large screens, enabling you to see people and content more clearly.

Neat Pad

Neat Pad is a slimline, discrete touchscreen device for starting and controlling your meeting or checking room availability to book and reserve workspaces. Neat Pad pairs with Neat Bar and Neat Bar Pro to complete your meeting room experience.

Neat Board

Neat Board is the complete meeting room package in a simple, all-in-one device. Comprising a 65" multi-touch screen, a powerful audio system and a versatile wide-angle camera, Neat Board makes annotating and whiteboarding simple for ideation sessions.

Neat Board 50

Neat Board 50 is a sleek yet powerful device designed for greater flexibility throughout your office spaces. The 50-inch touchscreen system paired with an adaptive stand or wall mount, allows anyone to adjust the screen up or down for optimal use and viewing.

Neat Center

Neat Center is a companion device that extends the power of other Neat devices and Neat Symmetry to ensure remote meeting attendees enjoy a consistently closer, clearer, face-on audio-visual perspective of everyone in the room.

Neat Frame

Neat Frame is a unique portrait-oriented touch-screen device ideal for your home office, company's huddle spaces, or hotdesking areas, providing a convenient way to meet. Its superb eye-level camera gives you a naturally engaging, inclusive meeting experience.

Powering corporate communications, Sharp/NEC offers the widest portfolio of sustainable display solutions, driving productivity and minimising costs, with long life reliability and industry-leading service and support.
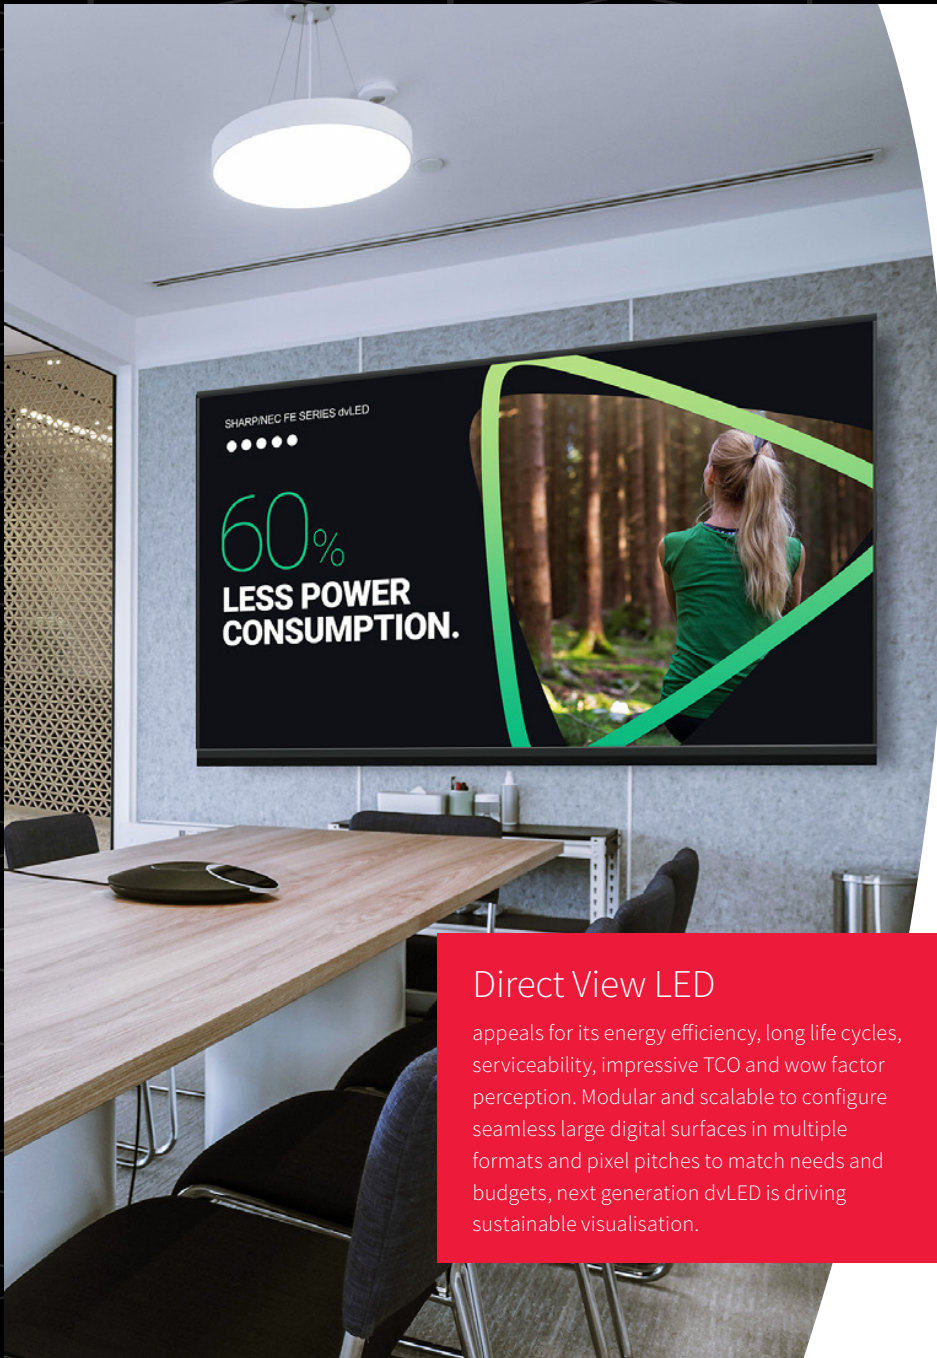

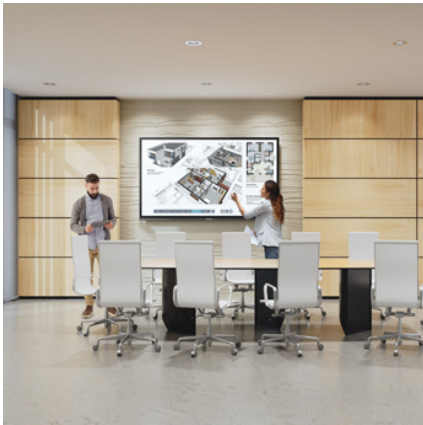

Direct View LED

appeals for its energy efficiency, long life cycles, serviceability, impressive TCO and wow factor perception. Modular and scalable to configure seamless large digital surfaces in multiple formats and pixel pitches to match needs and budgets, next generation dvLED is driving sustainable visualisation.

Interactive & Collaborative Solutions

enable both in-room and remote teams to engage and collaborate, annotating content in real-time. Sizes from 43" to 86" diagonal, provide the perfect-fit screen estate for small to larger groups, many with native USB-C connectivity supporting frictionless workflows.

Large Format Displays

remain the go-to technology for impactful presentations in any size of meeting room, or for eye-catching digital signage applications. In sizes 32" up to a vast 98" diagonal, with upgradable integrated computing power and high haze filter, content playback is clear to see even in brightly lit spaces.

www.sharpnecdisplays.eu

SHARP / NEC
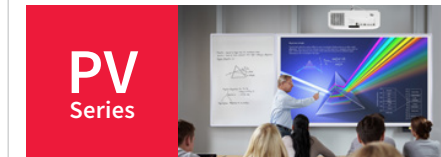

The versatility of laser projection

Offering the lowest cost per square metre of image, laser projection is perhaps the most versatile and cost-effective display technology. For scalable, bezel-free, large-scale visualisation, laser projection appeals for so many applications in conferencing, higher education, leisure, and more.

What are the benefits of Sharp/NEC laser projection?

- Long life sustainability
- Zero maintenance - no lamp nor filter exchange
- Low energy consumption
- Low fan noise / silent operation
- Almost unlimited flexibility and scalability
- Unobtrusive installation
- Use any surface to project onto
- Trusted reliability from high quality brand
- Industry leading service and support
- NEC legacy in digital cinema

Slim-line version of the well-proven Rhobus® range. With its clean lines and superior finish options, this range answers all the needs of the corporate user. Capable of accepting a wide variety of screen sizes with lockable equipment and cable management within mast. Convenient power cable input with built-in IEC socket.

- Easily swap from castors to static feet.
- Easy access to 440 x 470 x 80mm mast housing via lockable pull down door.
- Includes universal screen mount and built in 4-way power socket.
- Trolley and bolt down versions.
- Video conference accessories available.
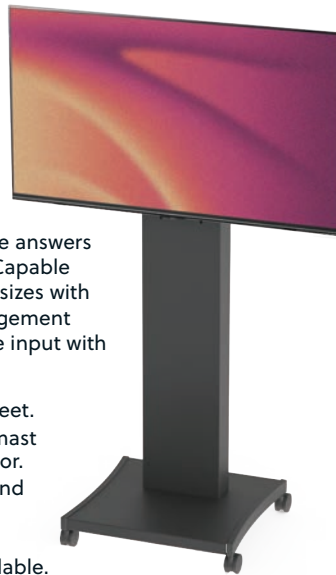

NEW!
Accession™ Service Mount

Smooth scissor action pull-out system provides an impressive opening depth of 345mm - allowing spacious and efficient servicing. Integrated twin AV trays accommodate a wide variety of devices and can be moved laterally to cater for mains and other wall and cable inputs. Wall mounted as standard with floor-to-wall and floor-to-ceiling versions available. Compatible with UNICOL's range of sound bar, video bar and video conference mounts.
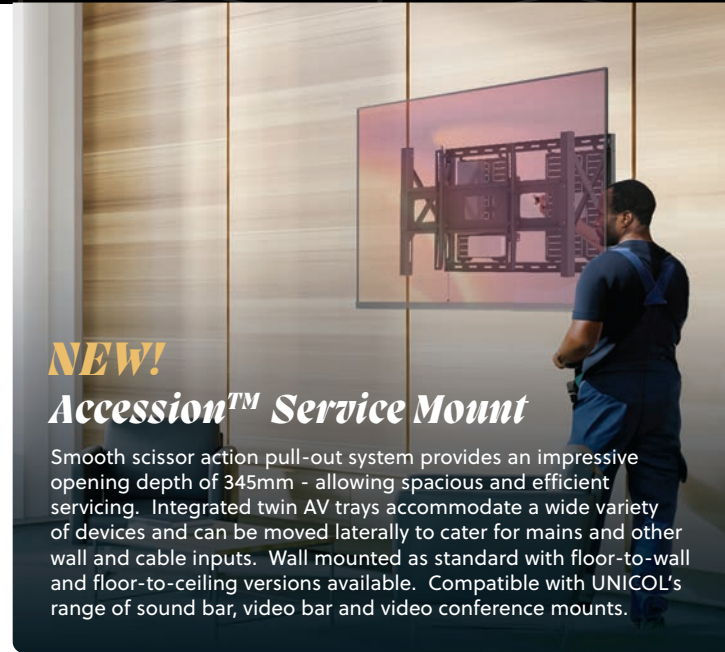

Canterbury™
Freestanding Lecterns

A versatile lectern that provides secure storage for media electronics with 19" 16U rack mounting as standard. Stylish oval cabinet has concealed castors with jacking feet for stability on uneven surfaces.

- Customised control housing options.
- Secure front and rear access.
- Lockable with key alike options.
- 19" 16U rack as standard.
- Quality 36mm thick wood finish.
- Articulated screen arm included.

Nest-Star®
Teaching Aid Trolley

The Nest-Star® is a complete teaching assistant on wheels that can be deployed quickly and neatly stowed when not in use. This robust trolley securely supports your displays and AV devices.

- Quick and easy deployment.
- Plain mast as standard with custom cut-outs available on request.
- Secure AV device storage.
- Custom colour options.
- Video conference accessories available.
- Handles provided as standard
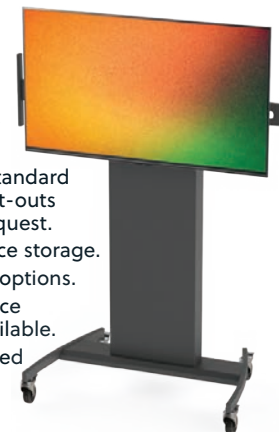

Edgeline™
Kiosks & Totems

A well-proven and flexible range of digital signage mounting systems. Designed to meet the widely varying needs of corporate, retail display, airport or similar applications & more.

- Rapid turnaround.
- Designed and manufactured to fit each screen make and model.
- Space for players, PC's, VC cameras etc.
- Polycarbonate protective screen options.
- Custom colour finishes and corporate branding at extra cost.
